

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. EXPLANATION OF CLASSIFICATION.

The general idea of this system is, *First*, the division and arrangement of the books, in such principal and subordinate classes, as will make it most easy to determine what works the Library contains, on any topic, and in what part of the collection books on any given subject are to be found; and, *Second*, the numbering and arranging them on the shelves in such a way that they can be most readily found without consulting a catalogue, or stopping to ascertain the shelf number.

In working out this idea it was found that all the books in any library of a general character, could be gathered into about twenty primary groups or classes, each of which would have a certain completeness, and would embrace a kind of book that was not included in any other class; and also, that the works in each of these several groups or classes, while having certain characteristics in common, yet had peculiarities which furnish ground for the formation of subordinate classes. Some of these primary classes could readily be divided into fifteen or more secondary classes, while others required only six or eight; and it seemed altogether best, to make such an arrangement of classes, and sub-classes, as would be at once recognized as natural and convenient in practical operation.

In making this distribution into classes, it was found that about one half of the old divisions in the Library, could be retained as primary classes in the new arrangement, with more or less of transferring of individual books; among these classes are those of History, Biography, Theology, Fine Arts and Medicine. In other cases, two or more of the old classes were found to embrace works that had close affinities with each other, and so they were consolidated to form new primary classes; thus, the old divisions of Poetry and Drama, have been united to form one primary class, under the compound name; and the three former classes, Natural Philosophy, Astronomy and Mathematics, have been united into one, under the name of Mathematics and Physics. The old classes of Commerce and Agriculture has been consolidated with that of Useful Arts; and that of Political Economy has been combined with Sociology and Law.

The primary classes as they now stand are these, viz.:

	Designated as Class
Theology,.....	A.
Sociology and Law,.....	B.
General History,.....	C.
History of Asia and Africa,.....	D.
History of Europe,.....	E.

Prose Fiction,.....	

The order of these classes is different from that formerly in use, but is a more natural one, and will be found more useful for the purposes of study, and as an aid in the finding of books.

As will be seen, the old method of designating the classes by numerals has been given up, and letters are used in place of figures; capitals being used for the *primary* classes, and small letters for the *subordinate* classes. The object of this is to make two characters serve to designate a large number of classes, and especially to show the relation of subordinate classes to each other. All the books in the library having the same *class* designation are at once seen to belong to our primary class.

Formerly, the books were placed on the shelves at random, and without any attempt at alphabetical arrangement. Under the new system, the books in each sub-class are placed on the shelves in strict *alphabetical order*, by the names of the *authors*, excepting in *Biography*; or if the author is unknown they are arranged according to the *titles*.

A scheme for numbering the books has been adopted, which admits of an indefinite enlargement of each of the divisions by the insertion of other works in their alphabetical place, without disturbing the *numerical order*. This scheme consists in the assignment of ten thousand numbers (0 to 9999) to each of the subordinate classes, and the distribution of all the names of authors over this whole range of numbers. This is done by reference to a table constructed for the purpose which includes all possible combinations of letters, and is based on a comparison of the names occurring in several of the largest catalogues. A reference to this table determines the number that should be given to any new book that is added to any of the classes. It follows, of course, that works by any given author, have the same number in whatever part of the Library they may be found. This will be found to be an important guide to the ready finding of books.

It was found necessary to treat the department of *Biography* in a special manner, because, here no subjective arrangement was practicable, and some subdivision was necessary on account of the extent and importance of this class. It was therefore decided to put into one group, all Biographical Dictionaries and other *collections* of lives, and into another group, or series of groups, all individual biographies. In the first group the books are arranged in alphabetical order by the name of *author* or editor, or by titles if anonymous; and are designated by the single letter L. The books forming the collection of individual biographies are arranged in twenty-six groups, according to the names of the *subjects* of the biographies, or the persons whose lives are written. These are designated by the capital letter L and a small letter, which is the initial of the person whose life is written. Thus, the books in the first of these groups are marked La, in the second, Lb, in the third, Lc, and so on through the alphabet. In each of these groups the books are arranged on the shelves in alphabetical order, *not* by name of *author*, as in other parts of the Library, but by the *subject* of the biography; thus, bringing all the lives of any one person together on the same shelf. Each of the groups in this department is numbered independently, and on the scheme employed in other parts of the Library.

The department of *Prose Fiction*, in our Library, is a large one and some subdivision of it, as an aid to the ready finding of particular books, is quite essential. As no division by original language, or by subject, could be of much practical advantage a treatment of it was adopted, somewhat similar to that employed in the department of *Biography*. All the Novels have been arranged in twenty-six groups; those whose writers' names begin with A., forming one group, those beginning with B. another, and those with C. a third, and so on through the alphabet. These initial letters are placed on the books in connection with the numbers, and serve also to distinguish the several groups. The authors in each of these groups are arranged in close alphabetical order, and the individual books of each author, are placed in alphabetical order by their titles. In this department no letter or other character is used as a general designation of the *class*; the method of numbering, and the form of the label being sufficient to distinguish the books from those of any other class.

The plan adopted for numbering the books in this department differs from that employed in other parts of the Library, in using *two sets* of figures. The first, or upper number in connection with the initial letter, designates the *author*, or a group of authors whose names are very

nearly alike; and the second, or lower number designates the individual books of each author. It follows that all the Novels of any author,—and of some others standing in close proximity with these,—bear the same author-number in connection with the common initial, while the second or lower number is different for each work under this author-number. Thus, all the books written by Barker, Barkley, Barlee, and by other persons whose names may fall between these have B. 118, as the first or author-number; while the second or lower numbers of all the books written by these persons will range from 1 to 999. Each of these twenty-six groups of Novels is numbered independently, and the numbers in no case consist of more than three figures in each set. Wide spaces are left, as in the other classes, so as to allow the insertion of other books in their proper places, and the perpetuation indefinitely of the alphabetical and numerical order on the shelves.

The following synopsis of the New Classification will serve as an aid in the better understanding and use of the system.

SYNOPSIS OF THE NEW CLASSIFICATION.

EXHIBITING THE VARIOUS CLASSES AND SUB-CLASSES AND THEIR RELATION TO EACH OTHER.

Biographical Dictionaries; Collections of Biographies; Lives of classes of persons, as Artists, Lawyers, Sovereigns, and lives of several persons included in one volume or series of volumes. All these are marked with the single letter **L**.

Lives of single individuals are arranged in alphabetical order under the name of the person whose life is written, thus placing all the lives of each person side by side on the same shelf.

These individual lives are marked with the class designation **L**, and also with another letter which is the initial letter of the surname of the person whose life is written.

Thus all lives of Adams, Ames, Arthur, Austin, are marked **La**. Lives of Bacon, Ballard, Brown, Burke, are marked **Lb**.
